## 1. PRODUCT, SUPPLIER & MANUFACTURER CONTACT DETAILS

## 1.1 Supplier Information

Company Name	Rooibos Limited
Trading Name	Rooibos Limited/Rooibos
Business Address	Rooibos Avenue, Clanwilliam, 8135
Postal Address	PO Box 64, Clanwilliam, 8135
Technical Contact Person	Liezel Slabber
Position Title	QA Manager
Phone	+27 27 4822155
Fax	+27 27 4821844
Cell phone (mobile)	082 8812458
Email	Liezel.slabber@rooibosltd.co.za

## 1.2 Manufacturer(s) or Producer Information

(Complete only when manufacturer or producer is different to supplier, e.g. bought from distributor or agent. List all alternative sources or suppliers.)

Company Name	Site of Manufacture or production (City & Country)

### 2. PRODUCT INFORMATION & INGREDIENTS

## 2.1 Product description

(Physical and Technological Description)

A blend of dry and processed needle like leaves and fine stems of the Rooibos plant (100% Aspalathus linearis) after it has been cut, bruised, fermented, dried, heat treated, dried and bagged. To be used as a tea or herbal infusion.

# 3.4 Use of Gene Technology (genetically modified or engineered, GM or GE)

#### **Rooibos Limited GM Labelling Principles:**

- 1) If derived from a potential genetically modified crop, and there is no guarantee that the ingredient is not derived from a GM crop, the product is labelled "Genetically Modified (GM)".
- Potential GM crops: Soya, Maize/Corn, Cotton, Chicory, Linseed/Flax, Papaya, Canola/Rapeseed, Rice, Squash/Pumpkin, Sugar beet, Sweet pepper and Tomato. (also refer to ISAAA's website and crop reports available at www.isaaa.org)
- We indicate the presence of ingredients from GM crop sources. No matter how small the percentage or even if there are no traces of GM DNA in the final product. GM cannot be "processed out" of a product. If an ingredient is derived from a crop source that is genetically modified, the final ingredient is deemed to be genetically modified, even if the final product does not contain any traces of the genetically modified DNA. For example, highly refined products such as oil or lecithin may not contain any protein, and may therefore test negative for GM, irrespective of the GM status of the original crop source.
- 3) Product from animals where the animal was fed on GM-feed is not labelled.
- 4) Ingredients and processing aids prepared by a fermentation process using genetically modified microorganisms (GMM) are not labelled as GM. For example, enzymes derived from a fermentation process under contained conditions are not labelled as GM, although the microorganisms responsible for the fermentation process may have been genetically modified. However, in this situation, it is important to check the GM status of the substrate that was used in the fermentation process. (This is in line with the Eu's standing Committee on Food chain and Animal Health (GM section) decision on 24 September 2004 that a GMM did not fall within the scope of Regulation EC/1829/2003.)
- 5) In accordance with South African law, a product that is significantly different due to genetic modification will be labelled.

Q1	Are there any ingredients in this product (including food additives, processing aids and enzymes) which contain or have been derived form genetically modified material or have been produced using the application either directly or indirectly of genetically modified substrates or genetically modified organisms?								
	No – Go to Section 3.5								
Q2	Q2 Does this product require labelling in accordance with R.25 of 16 January 2004: Regulations relating to the Labelling of Foodstuffs obtained through Certain Techniques of Genetic Modification?								
	Yes No								
Q3	This product:								
	Does not contain genetically modified novel DNA and/or novel protein								
	Contains or May contain genetically modified novel DNA and/or novel protein exempt from labelling								
	Contains or May contain genetically modified novel DNA and/or novel protein which requires labelling								
Q4									
	Yes No								
If 'YE	S' list the GM components and altered characteristics	s:							
	GM Component	Altered Characteristics							
05	O5 The genetically modified components of this product are classified as (select appropriate hox).

Genetically modified food – containing novel DNA and/or novel protein
Genetically modified food – highly refined to remove novel DNA and/or novel protein
Genetically modified food additives or processing aids where novel DNA and/or novel protein is present
Genetically modified food additives or processing aids where novel DNA and/or novel protein is not present
Enzymes originating from genetically modified organisms where no novel DNA and/or novel protein is present
Other – specify

## 3.5 Engineered nanomaterial

**Engineered Nanomaterial** means any intentionally produced material that has one or more dimentions of the order of 100nm or less or that is composed of discrete funtional parts, either internally or at the surface, many of which have one or more dimensions of the order of 100nm or less, including structures, agglomerates or aggregates, which may have a size above the order of 100nm but retain properties that are characteristic of the nanoscale. Properties that are characteristic of the nanoscale include:

- i) Those related to the large specific surface area of the materials considered; and/or
- ii) Specific physic-chemical properties that are different from those of the non-nanoform of the same material.

Is this ingredient or the ingredients in this product nano engineered? 

Yes No

### 3.6 Additional Compositional Consumer Information

Indicate if the product contains or is manufactured from any of the following

Food / Component	Yes	No	*If YES additional information must be inserted where prompted

## 7. ADDITIONAL INFORMATION/COMMENTS

#### 8. SPECIFICATIONS

Test methods must quote AOAC methods or recognised independent or international standards. Where a supplier's internal test method is quoted, the method must be attached.

#### 8.1 Physical Specification

(Examples may include particle size, shape, specific gravity, metal detection, foreign matter tolerances, physical defect tolerances etc. as appropriate for the product)

Test / Parameter	Specification	Test Method
Moisture	<10 %	Mettler Toledo HB43-S Halogen
Bulk density (free fall)	340 - 380 cc/100g	Free fall density expressed as volume/weight
Foreign plant material	<1%	Visual
Ash	<4%	Verified annually for this grade
Lumps	<0.1%	Determined by sieving and expressed as w/w
Long needle like leaves (indent)	<0.1%	Determined by sieving and expressed as w/w
Dust	<1%	Simons Mini Sifter @190 rpm. <60 Mesh (0.2mm)
		expressed as w/w.
Particles > 10 Mesh (2mm)	0 – 5%	Simons Mini Sifter @190 rpm. >10 Mesh (2mm)
		expressed as w/w.
Particles > 12 Mesh (1.5mm)	10 – 20%	Simons Mini Sifter @190 rpm. >12 Mesh (1.5mm)
**		expressed as w/w.
Particles > 16 Mesh (1.2mm)	20 – 40%	Simons Mini Sifter @190 rpm. >16 Mesh (1.2mm)
		expressed as w/w.
Particles > 20 Mesh (0.9mm)	30 – 40%	Simons Mini Sifter @190 rpm. >20 Mesh (0.9mm)
		expressed as w/w.
Particles > 60 Mesh (0.2mm)	15 – 35%	Simons Mini Sifter @190 rpm. >60 Mesh (0.2mm)
W 562		expressed as w/w.

# 8.2 Chemical specification

(Examples may include Salt, acid, pH, histamine, moisture, brix, Aw, pesticide compliance etc. as appropriate for the product)

Rooibos batches are tested by an accredited third party testing facility according to a testing regime which includes pesticides registered for Rooibos, as well as common pesticides often used on crops cultivated in the production region. Product will conform to the MRL levels as stipulated by (EU) Regulation No. 212/2013. The full testing regime as well as testing methods are available on request.

## 8.2.1 Heavy Metals:

Test / Parameter	Typical content	Unit of measure
Arsenic (As)	<0.03	Mg/kg
Cadmium (Cd)	<0.015	Mg/kg
Lead (Pb)	<0.052	Mg/kg
Mercury (Hg)	<0.1	Mg/kg
Tin (Sn)	<0.1	Mg/100g

## Data Source:

Analysed – i.e. Laboratory	Lab Name:	Accreditation:	Date Tested:
Tested	Microchem	SANAS T0393	20/6/2017

	Number:	(SP)PR-006	Name:	Product Information – P06 & P08 (FRU) SPECIFICATION SHEET
	Revision:	0	Effective Date:	2017.10.16
ROOIBOS	Context:	QA (Forms)	Status:	Approved
— LIMITED— Private and Confidential	Owners:	Anne Smith	Approvers:	Liezel Slabber

#### 8.3 Microbiological Specification

(Examples may include standard plate count, yeasts & moulds, coliforms, salmonella, listeria, etc. as appropriate for the product)

Test / Parameter	Specification	Unit of measure	Test Method
Total Plate Count	<300 000	Cfu/g	ISO 4833:1991
Escherichia Coli	Not detected	Count per gram	ISO 4832:1991
Salmonella	Absent	Count per 25g	ISO 6579:2002
Yeast & Moulds	<5000	Cfu/g	ISO 7954
Coliforms	<1000	Cfu/g	ISO 4862:1991

### 8.4 Sensory Specifications

Test / Parameter	Specification	
Appearance	Finely cut plant material, white crushed stems.	
Colour	Brick red dry appearance with occasional white particles.	
Flavour & aroma	Woody, honey like aroma and taste with hints of caramel and fruit.	

## 9. FOOD SAFETY & QUALITY ASSURANCE

(List applicable certification standards, for example; FSSC 22000, HACCP, ISO, BRC, GMP, etc.)

Quality or Food Safety Standard:	Certification/ (yes/no)	Certificate Reference No.
HACCP (SANS 10330:2007)	Yes	LHS 8

#### 10. SUPPLIER DECLARATION AND WARRANTY

Rooibos Limited -

- 1. Certifies that this product complies with all relevant South African legislation;
- Acknowledges that the Customer, and Supply Chain Customers of the Customer, will rely on the accuracy of the Product Information for food quality, safety and labelling purposes, and that errors or omissions in the above information may cause significant loss and damage;
- 3. Certifies that the Product information contained herein is true and accurate to the following degree:
  - a. That the Product Information in relation to ingredients that it buys in from a third party relies in good faith on Product information provided by that third party and attached to this declaration;
  - b. That the information in unconditionally true and accurate in relation to all other substances and processes;
- 4. Agrees that all Product it supplies to the Customer will conform with the Product information unless otherwise agreed to in writing and in advance by the customer;
- 5. Will immediately inform the Customer(and confirm in writing as soon as possible) if it becomes aware of any error or omission in the Product Information;
- 6. Will inform the Customer in writing and in advance of any change to the Product information provided herein; and
- 7. Acknowleges that the Customer may provide the Product Information to third parties.
